Best skills and what I want to do

Skills Building customised websites to the highest specifications. Working under pressure and to tight deadlines. Coming up with solutions to seemingly intractable problems. Making recommendations on the use of new and emerging technologies. The ability to work on your own with minimum supervision.

What I want to do Developing useful and interesting projects. Working closely with other developers and professionals. Continuous skill improvement. Motivating the team to self-development, inspire and organize.

Technical Skills

	Less than 2 years	From 2 to 5 years	More than 5 years
Languages	Golang, Dart	Node.js, PHP, Type-Script	JavaScript, HTML, CSS
Frameworks	Electron, React Native, Laravel, Meteor, Flutter	Redux/Flux, Vue.js, WatermelonDB, RxJS	React
Techniques			TDD, DDD, Scrum, Kanban
DBMS		PostgreSQL, MySQL, MongoDB	
CI/CD	Github Actions	Docker, Jenkins, Jest	Eslint, Mocha.js

Additional Skills

English IELTS score 6.5

Education

University

Sep 2002 - **Master of Computer Applications (M.C.A.), Computer science,**
Jun 2007 *Vyatka State University, Kirov, Russia.*
Studied Computer Science with some focus Artificial Intelligence.

Experience

- June 2022 - **Frontend developer**, *UAB Linqo, Lithuania*,
Present <https://linqo.eu>.
Development of the user interface of fleet management platform TrustTrack and mobile application OnTrack Go.
Technologies: React, RxJS, Redux, Flutter.
- Sep 2018 - **Frontend developer**, *WIZATA S.A., Luxembourg*,
Apr 2022 <https://www.wizata.com>.
Development of the user interface of Wizata Platform, a platform for digital transformation of the manufacturing process.
Technologies: React, WatermelonDB, Vue.js, RxJS.
- Aug 2019 - **Frontend developer**, *Amilabs Company Limited, Bangkok, Thailand*,
Aug 2021 <https://amilabs.pro>.
Development of the user interface of Everex Cash digital wallet (everex.cash) and Ethereum tokens explorer (ethplorer.io).
Technologies: React, Meteor, MongoDB.
- Mar 2018 - **Web developer**, *Fonseka Innovations Pty. Ltd., Brisbane, Australia*,
Aug 2018 <https://fonsekainnovations.com>.
Development the dedicated crop assessing application AgClaims for agricultural insurance claims.
Took part in application development for the purchase of insurance programs.
Technologies: React, React Native, Realm, Vue.js, Vuex.
- Dec 2016 - **Frontend developer**, *Mail.Ru LLC, Moscow, Russia*,
Dec 2017 <https://mail.ru>.
Development the user interface of the web version of the Calendar.
Participated in the development of services for business.
Development the library of UI components. Client optimization.
Technologies: React, Vanilla JS, homemade MVC framework, Karma, Electron, etc.
- Jan 2013 - **Frontend developer, Team leader of the group for development of interfaces for postal services**, *Yandex LLC, Moscow, Russia*,
Dec 2016 <https://yandex.com>.
Development the user interface of the web version of the Mail (mail.yandex.com).
Development of new services for teamwork (connect.yandex.com).
Optimization for old browsers. Client optimization. Writing tests.
Training of new developers. Organization of development in the team.
Technologies: Node.js, React, Redux, Immutable.js, Noscript (homemade MVC framework), Karma, Ckeditor, Custom Elements, Vanilla JS, WebSocket, WebRTC, etc.
- Apr 2006 - **Web developer**, *Lightsoft Research LLC, Moscow, Russia*,
Dec 2012 <https://www.linkedin.com/company/lightsoft-research>.
Development of server and client side projects for tourism.
Development of the project information database of hotels (TopHotels).
Participated in the development of search system for tours for travel agencies and tourists (TourIndex, TurPoisk).
Project development for cross-authorization between company projects (AgentPassport).
Database design and optimization, migration from Oracle/MySQL to PostgreSQL. Configuring servers, load balancing, SEO/client optimization.
Organization of development in the team. Training of new developers.
Technologies: PHP, PostgreSQL, MySQL, RabbitMQ, Nginx, Vanilla JS

Projects

Commercial Projects

- OnTrack Go <https://play.google.com/store/apps/details?id=apk.drivers>
Task management platform.
Developing the application from scratch using Flutter for Android and iOS.
- TrustTrack <https://track2.ruptela.com>
Fleet management platform.
Development of the user interface of the platform. Refactoring and performance optimization. Improving skills of RxJS, React and Google Maps. Migration from Angular to React.
- Wizata Platform <https://www.wizata.com/platform>
Digital Twin of manufacturing process.
Development of the user interface of the platform. Performance optimization. Increase application availability. Improving skills of creation PWA and offline first applications, working with offline database WatermelonDB, and improving skills of Vue.js and React.
- Ethplorer <https://ethplorer.io>
Ethereum tokens explorer.
Development of the user interface of the tokens explorer. Performance optimization. Implemented UI for tokens watching service, labels, charts and profile. Improving skills of React, Meteor and MongoDB.
- Everex Cash <https://everex.cash>
Digital wallet.
Development of the user interface of the digital wallet. Performance optimization, bug fixes, stability improvement. Improving skills of React, Meteor and MongoDB.
- Mail <https://mail.yandex.com>
Web client for e-mail.
Development of a highly loaded project. Refactoring and optimization. Organization of development in the team. Hiring and training of new developers.
- Connect <https://connect.yandex.com>
Set of services for teamwork: e-mail, messenger, calendar, etc.
Development of the project from scratch using modern technologies: React/Redux, WebSockets, Immutable data, etc. Organization of development in a team of 4 people.
- AgClaims <https://play.google.com/store/apps/details?id=com.agclaims>
AgClaims inspection app is a dedicated crop assessing app for agricultural insurance claims.
Getting experience of development on React Native.
- Calendar <https://calendar.mail.ru>
Web client for calendar.
Participation in the development the user interface of the web version of the calendar. Refactoring and optimization. Improving the skills of native JS.

TopHotels <https://tophotels.org>

Information rating of hotels.

Development of a highly loaded project. Getting skills to work with PHP and PostgreSQL: optimization, database design. Configuring servers, load balancing, SEO optimization.

Personal Projects

TravelTime <https://traveltime.guide>

Thailand travel guide.

Developing the application from scratch using Flutter. Create frontend, backend, UX/UI, design. Getting skills working with Ansible, Dart, Flutter, Strapi.
